DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: the missing serial number of the co-pending application recited in paragraphs [002] and [022] should be provided.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are not clear regarding "said frame" (for example at line 11 of claim 1). It is not clear if "said frame" refers to the frame (32b) adapted to support the platen roller recited earlier in the claim or to the frame section (16) for mounting the printheads (see paragraph [019]). If "said frame" refers to the latter then it lacks antecedent basis. Note paragraph [027] where the platen roller assemblies are said to extend through the frame 16 to the thermal printheads.

Claims 2, 3 and 4 are not clear regarding "said frame" (claim 2, line 1; claim 4, line 1). It is not clear if "said frame" refers to the frame (32b) adapted to support the platen roller recited earlier in the claim or to the frame section (16) for mounting the printheads (see paragraph [019]). The frame (of the platen roller assembly) is fixedly mounted to a pivotally mounted support member (36 or 40) and as such the frame is not adapted to pivot. As described in

Art Unit: 2861

paragraph [024] of the specification, it is the support member (36 or 40) that rotates around respective axis at a pivot point (46 or 48).]). If "said frame" refers to the frame (16) for mounting the printheads (see paragraph [019]) then it lacks antecedent basis.

Claims 6, 8-10, "the first said thermal print heads" lacks antecedent basis. The one or more thermal print heads recited in Claim 1 should be amended to provide proper antecedent basis for "the first said thermal print heads".
